

## **Worldwide Clinical Trials recognized as leader in Quality, Performance**

**King of Prussia, Pa.** – Worldwide Clinical Trials has been recognized as a leader in Quality, Productivity and Regulatory performance by the 2014 CRO Leadership Awards, sponsored by Life Science Leader.

The annual awards are determined by market research conducted by Nice Insight. More than 40,000 pharmaceutical and biotech decision maker and influencers were invited to participate in this year’s survey; over 10,000 responses were received.

Respondents were divided into four categories: Emerging Pharma, Big Pharma, Biotech and Emerging Biotech. Winning CROs were rated in the top 20 percent in the following categories: Quality, Productivity, Regulatory, Innovation and Reliability.

Worldwide Clinical Trials was named a winner in three out of five categories (Quality, Productivity and Regulatory) by both the Biotech and Emerging Biotech categories of voters.

According to the survey, voters consider Quality to be the number one priority when selecting a CRO partner.

“At WCT, drug development is personal. We believe a strategic balance of science, medicine and operations provides the foundation for successful execution of clinical trials. Quality is inherent in everything we do; it’s very gratifying to know our clients feel exactly the same way,” said Neal R. Cutler, M.D., CEO.
