A full-service CRO, Worldwide delivers fully integrated clinical development and bioanalytical services for studies small to large, multi-site clinical trial programs, and first-in-human through phase IV clinical research programs, for customers of all sizes. Combining operational acumen, savvy decision-making, deft management, and commercial intelligence, Worldwide distinguishes itself as a medically and scientifically driven CRO, advocating methodological rigor in trial design and execution. Worldwide helps sponsors the move from medical discovery into clinical development and commercialisation, helping to bring innovative solutions to market that deliver enhanced value and improve patient lives.

Worldwide piqued the interests of the Corporate LiveWire team due to their excellent work with clients; Worldwide labours to provide a collaborative service to facilitate the discovery of live-changing medicines. Their personalised, consultative approach ensures that each sponsor company that works with Worldwide is ensured exceptional service fitted to their needs. Worldwide's work in neuroscience is particularly impressive, as they offer a full range of services for a variety of indications, ranging from neurological diseases to psychiatry and analgesia. Their previous research on Alzheimer's is outstanding; Worldwide's staff has contributed to the development of every drug class applicable to Alzheimer's disease in the past 20 years.

The Corporate LiveWire panel of judges particularly admired Worldwide Clinical Trial's commitment to constantly improving their services and expertly designing each particular component of a trial to meet their clients' requirements.

Recognised for flexibility and management team accessibility, Worldwide is committed to making each customer feel unique. The emphasis on follow-through and senior management oversight for all projects has increased the quality, safety and the speed of drug development, and has become characteristic of Worldwide's high-quality work.

Worldwide's 1,400 employees are among the best in their fields – clinicians, scientists, operational and regulatory specialists who can offer expertise across a range of therapeutic areas, including: neuroscience, cardiovascular diseases, immune-mediated inflammatory disorders (IMID), and rare diseases.

The company has offices in North and South America, Eastern and Western Europe, Russia and Asia-Pacific. With clinical operations and medical and scientific personnel in 60 countries across six continents, Worldwide offers a unique understanding of local cultures, regulatory requirements and standard practices of medicine.
