- Health Outcomes

## OVERVIEW

Founded by physicians committed to advancing medical science, Worldwide is out to change how the world sees CROs — in the best possible way. Supporting clinical studies from Phase IIb through post approval, our Late Phase service offers world-class drug development expertise.

Combining recognized therapeutic leadership, most notably in Neuroscience, Cardiovascular, and Immune-Mediated Inflammatory Disease, with a robust global operations platform, we successfully manage clinical trials for biopharma companies across the globe.

With infrastructure and talent spanning 60 countries, we execute predictable, successful studies with operational excellence. We never compromise on science or safety. We're never satisfied with the status quo. We're the Cure for the Common CRO.

## OUR MISSION

We know what you've come to expect from other CROs — and we're working to defy those expectations every day. Worldwide is the first customer-centric CRO. Founded by physicians dedicated to advancing medical science and built on an unwavering commitment to operational excellence, we are able to strategically balance science, medicine, operations, and commercial intelligence to achieve successful drug development.

We take a never satisfied approach. Tackling every Phase IIb-IV drug development program as an opportunity to demonstrate a deep commitment to each client's unique needs. Combining therapeutic expertise — most notably in Neuroscience, Cardiovascular, and Immune-Mediated Inflammatory Disease, and Rare Disease — with proactive insights and rigorous operations, we successfully manage clinical trials across more than 60 countries.

Our mission is to foster the development of life-changing medicines by integrating clinical trial methodology, operational acumen, and efficient technology.

## THERAPEUTIC AREAS: FOCUSED EXPERTISE (REPRESENTATIVE INDICATIONS)

### NEUROSCIENCE

- Neurology: Alzheimer's disease, Parkinson's disease, Multiple Sclerosis, Epilepsy
- Psychiatry: Attention Deficit Hyperactivity Disorder, Schizophrenia, Depression
- Analgesia: Neuropathic pain, Post-operative pain, Cancer-associated pain

**TECHNOLOGY: FLEXIBLE,  
TRANSPARENT, INTEGRATED**

- Clinical Trial Management System (CTMS)
  - End-to-end tracking and reporting of all your study activities
- Electronic Data Capture (EDC)
  - Oracle® InForm
  - Merge Healthcare eClinical OS™
  - Medidata Rave®
  - Other tools available
- Clinical Assessment, Training, and Surveillance
  - Unique, rigorous rater
  - Scale identification, selection, management
  - Validation of key eligibility criteria
  - Data surveillance during trial lifecycle
- IxRS (Interactive Voice/Web Response System)
  - Manage enrollment/ randomization; dosing/drug dispensation; drug inventory/unblinding
- PayFlow
  - System-agnostic tool designed to enable site and investigator payments management
- Biostatistical Analysis
  - Using SAS in a centralized server environment
  - Design, planning, delivery of submission ready data

**CARDIOVASCULAR**

- Ischaemic Heart Disease
- Heart Failure
- Atrial Fibrillation
- Peripheral Artery Disease
- Aortic Aneurysm
- Venous Thromboembolism
- Atherosclerotic Disease
- Arterial Hypertension
- Stroke

**IMMUNE-MEDIATED  
INFLAMMATORY DISEASE**

- Rheumatoid Arthritis
- Juvenile Arthritis
  - Ankylosing Spondylitis
  - Systemic Lupus Erythematosus and Lupus Nephritis
  - Osteoarthritis
  - Psoriatic Arthritis
  - Psoriasis
  - Crohn's Disease
  - Ulcerative Colitis

**RARE DISEASE**

- Acromegaly
- Active systemic onset juvenile idiopathic arthritis
- Cystic Fibrosis
- Duchenne muscular dystrophy
- Fabry disease
- Gaucher's disease
- Hemophagocytic Lymphohistiocytosis
- Idiopathic Pulmonary Fibrosis
- Idiopathic thrombocytopenic Purpura
- Lambert-Eaton Myasthenic syndrome
- Mucopolysaccharidosis I (Hurler syndrome)
- Mucopolysaccharidosis II (Hunter syndrome)
- Mucopolysaccharidosis VI (Maroteaux-Lamy syndrome)
- Sickle Cell disease
- Thrombotic Microangiopathy
- Von Willebrand disease
- Velocardiofacial syndrome, psychosis

**GLOBAL REACH:  
WORLDWIDE  
SOLUTIONS**

With clinical operations and medical and scientific personnel across more than 60 countries, we understand the local cultures, regulatory requirements and local standard practices of medicine to enable predictable study initiation and execution for our clients.

**EUROPE**

In addition to our offices in countries throughout Western, Northern and Central Europe, Worldwide Clinical Trials has a long-established presence and record of clinical expertise in Eastern Europe, where we have one of the largest groups in the market operating in Russia.

**NORTH AMERICA**

We are constantly building on more than a decade of providing excellence in clinical trial services across the United States and Canada.

**LATIN AMERICA**

Based in Buenos Aires, Worldwide Clinical Trials conducts trials across Argentina, Chile, Uruguay, Mexico, Brazil and Peru, where we operate through established and registered local subsidiaries.

**ASIA PACIFIC**

In this key region, Worldwide Clinical Trials is growing rapidly. Our strategic and operational presence includes China, Japan, Hong Kong, Singapore, India, Australia, New Zealand, Taiwan, South Korea, Malaysia and Indonesia, where we operate through established and registered local subsidiaries.

**MIDDLE EAST & AFRICA**

Our locations across these regions include Israel, Lebanon, Saudi Arabia and South Africa.
