

A COMMITTED PARTNER FOR YOUR PARKINSON'S DISEASE DEVELOPMENT PROGRAM

Worldwide Clinical Trials has a long history in supporting sponsors dedicated to advancing treatments for Parkinson's disease (PD). Our scientific teams have cultivated a broad, contemporary knowledge of PD and an accessible expertise that spans all phases of development.

We take a consultative approach with our sponsors, personalizing each partnership based on their unique needs and retaining the flexibility to adapt throughout the development of the program. Using our operational acumen, we drive forward efficient, high-quality trials that progress disease modifying therapies and symptomatic treatments alike. Our teams are experienced in delivery of PD trials with various therapeutic targets, strategies, and IMP types specific to PD studies and can help you secure the right sites for your next study.

PD & PD-PLUS* EXPERIENCE BY PHASE

*Includes a study in PSP and one in MSA

WORLDWIDE'S KEYS TO SUCCESSFUL STUDY CONDUCT

Targeted recruitment and retention strategies; e.g., in the recruitment of specific patient population cohorts such as early PD, iPD, and familial PD

Protocol optimization for science and participant experience

Partnerships with vendors that offer PD-specific services such as fluid biomarkers, digital biomarkers, and neuroimaging

Strong site relationships
