

Where Personalized Attention Meets Global Scale in Oncology Clinical Development

Your mission is fighting cancer. **Our mission is helping you achieve that.**

Successful oncology clinical development starts with a partner you can trust that has the global resources you need to execute your study. At Worldwide Clinical Trials, we work alongside you from first-in-human through to registration studies, leveraging our global reach to drive your study forward.

Though we are global, **our teams are local.** Our therapeutically aligned oncology experts:

- Are dedicated to supporting oncology clinical development
- Live locally in your area
- Are available and accessible to you
- Have deep experience with local regulations, standard of care, and nuances of the European region
- Personalize their approach to your needs and the needs of your trial

Meet Your Passionate Team

Worldwide's senior European subject matter experts have an average of **18 years of experience** supporting oncology development and are available to support you throughout your study.
