

Clinical Trial Liaison Team

In the face of increasingly complicated patient recruitment situations, drug development processes, and clinical trial designs, our experienced team of Clinical Trial Liaisons (CTLs) establishes strong relationships, addresses resourcing challenges, and accelerates recruitment rates. With experience in several different therapeutic areas across all phases, we can help you reach your goals.

Our approach combines expertise with strategic planning and execution to enhance patient enrollment and retention milestones. CTLs provide sites with focused patient-centric support to detect and track study-specific problems, gain information, and offer guidance on best practices for improved study enrollment.

Adult and Pediatric Experience | Phases 1 - 4

Our Services:

Appointment of Clinical Trial Liaison

Assist in the selection of most appropriate PIs, KOLs, and regions with pre-study engagement and customized relationship-building, aiding sponsors with overall recruitment strategy

Build and solidify site-level relationships with investigators, site staff, and anyone in between

Site-level introductions and implementation of routine checks-ins (e.g., weekly, biweekly, etc.)

Involvement in developing/crafting/execution of trial strategies with PIs, site staff, and sponsor

Identify and mitigate barriers to participation from a scientific perspective with a recruitment lens

Liaise with any vendors involved with and in the patient pathway and funnel

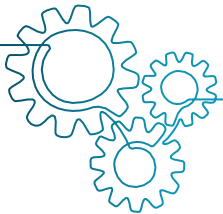

Our CTL team specializes in tailoring fully customized approaches to enhance the speed and quality of clinical trial development.

Study-Specific Support:

- Patient Advocacy Group collaboration
- Recruitment campaign support
- Site-specific initiatives
- Escalations
- Regional/cultural strategizing
- Amendments and protocol concerns
- Diversity plan support
- Physician networks
- Intense collaboration with CRAs, MM, CTM, GPL, sponsors, and any recruitment vendors

Additional Support:

- Study-agnostic therapeutic area support
- Therapeutic area relationship building
- Coaching of internal teams
- Consultancy for country, site, and PI identification
- Therapeutic area expertise
- Existing PI relationships
- Regional knowledge
- Direct support for diversity strategies at site and for overall study
- Vendors
