

Helping to Bring Immunotherapies to Cancer Patients in Need

Conducting oncology clinical research presents several strategic and operational challenges amidst rapidly advancing therapeutic modalities and increasingly sophisticated trial designs. At Worldwide Clinical Trials, our mission is to accelerate the development pathway for transformative immuno-oncology therapies by partnering to pilot the critical journey from early proof-of-concept through regulatory approval with precision and velocity. We have an acute awareness that expedited timelines directly translate into improved patient outcomes, offering hope to individuals and families confronting cancer diagnoses.

>45% of Our Active Oncology Portfolio is IO

- Cell therapies (CAR-T, TILs)
 - Autologous & allogeneic
 - Hematologic malignancies & solid tumors
- Multi-specific antibodies
 - T-cell & macrophage engagers
- Tumor microenvironment remodelers
- Oncolytic viruses & vaccines
- Gene therapies
- Novel checkpoint inhibitors

We Understand IO Trial Challenges

- Complex modalities
- Complex endpoints & novel study designs
- Patient recruitment challenges
- Biomarker or genomic selectivity
- Safety/toxicity profiles (CRS, ICANS, TLS< delayed reactions)
- Increased data collection
- Coordinating numerous vendors
- Use of combination therapies

Exclusively Biopharma-Focused

Built to work exclusively with biopharma, our flexible processes and approach allow us to listen first, align goals, and execute with an eye toward rapid shifts when protocols amend or Breakthrough designations move a product straight from Phase I to registration.

Seasoned Oncology Experts

With an average of 9+ years of oncology experience for key roles (PM, CTL, DM, and Clinical Science), our oncology specialty guarantees you a seasoned team across all functions.

A Transparent People-First Culture with Industry-Leading Retention

We are responsive and attentive to the needs of both our customers and staff. Our industry-leading employee and project team retention guarantees program continuity, increased efficiency, and happy investigative sites.

About Worldwide Clinical Trials

Worldwide Clinical Trials (Worldwide) is a global CRO serving development-driven biopharmaceutical companies, with more than 4,400 professionals operating across more than 70 countries. The company delivers therapeutically dedicated expertise in neuroscience, oncology, rare disease, and internal medicine, with comprehensive support across every development phase – from early-stage and first-in-human studies through Phase III registration trials.

The company's flexible service model – spanning full-service trial management to functional service partnerships through Worldwide Flex – is powered by a people-first, partnership-driven outsourcing approach that strengthens collaboration, enhances data transparency, and supports more informed decision-making. This provides sponsors with tailored, adaptable solutions that keep pace with the evolving demands of clinical research.
